

Homework

As mentioned in the introduction video, the repository with homework is located on Github <https://github.com/dotnetos/procsharp9-course>.

- Provided materials are licensed under the license. Please read it before using
- Homework challenges are self-assignment tasks. Feel free to fork the repository and complete them on your own

Open solution for Module 1 and go to the **InitOnly** project. Your job is:

1. Add missing constrain requirement to the **CarFactory.CreateCar** to use an object initializer
2. Implement **ICar** interface on the **Toyota** class
3. Implement car immutability by introducing **init** accessors to the properties
